In article <2ua3bj\$56@reznor.larc.nasa.gov> tai@rockola.larc.nasa.gov (Alan Tai) writes:

Alan> Has anyone gotten idl-shell.el (version 1.10) to run under Emacs

Alan> 19.25? Emacs complains, "Symbol's function definition is void:

Alan> full-copy-sparse-keymap". After a grep of my Emacs Lisp

Alan> directory, sure enough, it had been removed from comint.el. I

Alan> haven't had much luck in hacking it to work. Thanks.

Unfortunately we do not have Emacs 19.25 which comes with a new version of comint.el on which idl-shell.el is built. To make idl-shell.el work replace the occurrence of 'full-copy-sparse-keymap' with 'copy-keymap'. I will be sending the corrected version to the anonymous FTP site eos.crseo.ucsb.edu (if it still allows me to write there since the change).

I will also be keeping copies (as of about 3pm EST) of idl.el and idl-shell.el at the anonymous FTP site:

JHU/APL IDL library

fermi.jhuapl.edu [128.244.147.18]
/pub/idl

I appreciate any bug reports/comments/suggestions people can send me.

Later,
Chris
