Well, this is not the standard setting - so you or your Sysadmin must have done this. C-g normally does nothing except canceling whatever you are doing. If you are doing nothing, it just beeps, as Craig describes.

XEmacs 21.1 has goto-line standard on M-g

Emacs 20.6 has no standard binding to goto-line. To get it on M-g

like in XEmacs, put this into .emacs.

```
(define-key global-map "\M-g" 'goto-line)
```

Hope this helps
