
Subject: printing floats/integer

I wrote a small module for integers. The variable is formatted and returned.

"1" returns as "1"

Now this doesn't work with floats. for example if I want to print "1.22221"

I
don't want to see it as "1.2222210000000000000000" or
"1.222222"

Does anyone know how I can solve this ??

Greets Sean
