Subject: Menubar with ticks ?? Posted by Sean Heukels on Mon, 12 Mar 2001 16:10:35 GMT View Forum Message <> Reply to Message

Does IDL have this ??

I mean people who use Windows will know. An option in a meny bar that ism toggled by re-selecting. ON it has a V (tick) before its name and OFF it doesn't

I have some things that can be toggled in a program and the problem I am encountering is that I run out of space and would like to move some things to the menubar

Thanx Seansan
