`x=[5.12345, 45.378, 1300.3221, ...]`

`xyouts, 5,7, x[0]`

Will give: 5.12345 (in some window)

Want: 5.12

`xyouts, 5,7,format='(f4.2)',x[0]` ---- not allowed, although the following
is allowed but not what I need

`print,format='(f4.2)',x[0]` ---- not what I need

Any suggestion?

Thanks in advance,
Mark Chan
