Subject: how do I keep IDL quiet?

Posted by Jason Li on Tue, 27 Mar 2001 17:13:51 GMT

Hi,

I have an IDL routine "myMain" that calls upon many subroutine. Each time I
run myMain, it reports "compiled module ..." message for each subroutine it
has successfully compiled.

I am now running myMain repeatedly from an UNIX script and don't wish to see
these messages. How do I make IDL quiet?

thanks
