The Max Planck Institute for Meteorology, a multidisciplinary research center for Climate and Earth system modeling located in Hamburg, Germany, is opening a position for a scientific programmer in support of the atmospheric chemistry modeling group with the following responsibilities:

Development of chemistry modules for a global general circulation model and coupling of a chemistry transport model into this system; creation and management of model input data, and postprocessing and visualisation of model output. Candidates are required to have excellent programming skills (FORTRAN90, IDL) and to be familiar with atmospheric modeling.

The position can be filled immediately. Salary (BAT IIa to I) depends on qualification and experience. The appointment is initially limited to 3 years; applications for shorter time periods will also be considered.

Applications shall be sent to Mr. R. Letscher, Max Planck Institute for Meteorology, Bundesstr. 55, 20149 Hamburg, Germany and include a cover letter, a detailed curriculum vitae, and the names, addresses, and telephone numbers of two references. Please refer to this position as SP-Chem-1.

The Max Planck Institute of Meteorology is an equal opportunity employer. Handicapped persons with comparable qualification will receive preferential status.

Best regards,

Martin
