Another possibility instead of KILL\_NOTIFY described by Marc  
is to suppress this feature.

This is done by the keyword TLB\_FRAME\_ATTR to widget\_base()

Value Meaning

1 Base cannot be resized, minimized, or maximized.  
2 Suppress display of system menu.  
4 Suppress title bar.  
8 Base cannot be closed.  
16 Base cannot be moved.

regards

Reimar
