Try this with PLOT ;-)

You'll see plot object, plot ..., plot ... and only somewhere way down
the list you find what you were looking for. In the idlwave shell,
it's
IDL> plot
and here are your PLOT keywords.

> Help on size() is displayed for me and, if required <pageDown> gets me to

well, yes. But how many "page downs". Wait until you write widget
code. What did I read yesterday in David's book: there are over 60
keywords to widget_info alone!

Cheers,

Martin
