I had just a little bit of trouble getting this to work.
First of all, I had an older version of MGS_Container
on my path, that I had to get rid of. Then, I found
a typo on line 850 of HBB_TwoLists__Define.pro:

```
S_label = Self.LabelsNames[1]
```

Should be:

```
S_label = Self.LabelNames[1]
```

Now it works, but the two lists have taken over my computer!
You must have some BIG default lists. :-)

Cheers,

David
