Subject: IDL 5.4 last one for WIN95
Posted by Richard French on Thu, 12 Apr 2001 22:52:09 GMT

I got a message from RSI that IDL5.4 is the last version that will
be supported under Windows 95. I've tried to prowl www.rsinc.com to
find out what flavors of Windows WILL be supported by IDL5.5, but to
no avail. Is anyone else in the situation of not wanting to break
things on their (more or less) working PC that is running WIN95, and
wondering what will happen when IDL5.5 comes out?
