Subject: Tab Widgets?

Posted by Trevor Fulton on Thu, 12 Apr 2001 00:09:23 GMT

Hi All,

Is there a WIDGET_TAB or some such function
that creates a tab widget? By tab widget,
I'm referring to a GUI that where you switch
between different windows by clicking on
file folder-like tabs (Much like the way one
can switch between "Groups" and "Build Order"
in the IDL 5.4 DE)

Thanks in advance.

PS If responding by e-mail, please send
    messages to fulton@dansas.usask.ca
