Subject: Urgent: gif files generation via telnet
Posted by francesco.spada on Mon, 07 May 2001 22:14:18 GMT

Hi to everybody,

 I need to include some gif or jpg imgs in my thesis but I can
work only via telnet, so the old way I used for writing it:

    write_gif,namegif,TVRD()

doesn't work because I don't have a grphic window!! someone know if
there is a way to create a gif or jpg working, as I do, without a
graphic window? (I prefere not to convert eps to gif/jpg ... 'casue I
have some problem)

Thanks for any help

Francesco
