Subject: Checkbox Starting Checked

Hello all,
I am having some problems finding out how to use checkboxes in IDL. I
am looking for a way to have a
checkbox start (when the widget it realized) checked. I thought there
would be some value that I would
have to set with Widget_Control but I don't see what that value is. Am
I just missing it? Any help on using
IDL's checkboxes would be appreciated.

Thanks in advance,
Mark
