Subject: [Newbie]writing JPEG or GIF file with plot?

Posted by Yopsolo on Tue, 22 May 2001 15:55:04 GMT

Hy,

I have writting a procedure which draw on the screen 2D graphics
(withthe help of widgets and the functions PLOT, OPLOT and XYOUTS).

I would know how I have to transform my procedure in order to write my
graphic on a JPEG or GIF file without showing on screen my graphic.

Thanks a lot

Yann
