Subject: about memory
Posted by Hong Gang on Mon, 21 May 2001 19:54:10 GMT

Hallo all,

The following is the error given by my program.
    % Unable to allocate memory: to make array.
    Cannot allocate memory

I have some large arrays as Tb(632*664, 880). I do not know what is the
matter with the program.   Can anyone give me some idea?

Thanks very much!
