Subject: IDL and nedit language modes
Posted by williams.simon on Tue, 03 Jul 2001 23:20:31 GMT

Greetings

There was an old thread about IDL syntax highlighting in the nedit
editor a couple of years ago. I'm asking about the same thing now
because all the links mentioned there seem to be stale and the
attachments are missing on google.

Does anybody have a .nedit mode file or whatever to get nedit working
with IDL syntax highlighting?

Thanks in advance,

Simon Williams
