Hello, IDL users:

I have heard that IDL for the PC is coming out in August/92. This is what a fellow graduate student found out after talking to the IDL company (RSI). Apparently they had a beta version of IDL for DOS but it was so slow that they decided to abandon the program and the next implementation of IDL will be for Microsoft Windows 3.0.

My questions are:

- 1) Has anybody heard anything more about this ( or is this vapourware )?
- 2) Has anybody used the beta version of IDL for Windows ( if it exists yet ) and where can I get a copy?

Thanks for your time.
