Subject: rename and move files

Posted by yen on Thu, 02 Aug 2001 15:20:11 GMT

Hi,

I am running IDL 5.4 under mac os 9.1

Is there any IDL routines for renaming and moving files? My situation is
that I first save processed data in a temp file in a temp directory.
Depending on the outcome, I will decide if I want to keep the file, and
move it to a 'permanent' directory. It's quite tedious to do all these
manually.

Harry
