I'm struggling with the problem of determining font sizes in  
a device independent  
<br>way. Using the Hershey Fonts works ok but they are not very nice looking.  
The TT  
<br>Fonts are fuzzy (at least on my Unix system) and the Hardware Fonts  
tend to  
<br>produce unpredictable results in terms of the character size. This  
is particularly  
<br>annoying when using the Contour routine.&nbsp; Depending on character  
size individual  
<br>labels maybe supressed.  
<p>Thanks  
<br>Axel
