Well, this is what I see:

```
IDL> junk = obj_new('idlgraxis')
```

```
IDL> junk -> setproperty, /log
```

```
% IDLGRAXIS::SETPROPERTY: Warning: Infinite plot range.
```

```
IDL> junk -> setproperty, range=[0., 10000.], xcoord_conv =
```

```
normalize([0., 10000.])
```

```
% Compiled module: NORMALIZE.
```

```
% IDLGRAXIS::SETPROPERTY: Warning: Infinite plot range.
```

???

Pavel
