Subject: HELP files (generation of?)
Posted by sjt on Fri, 05 Aug 1994 12:14:43 GMT

Does anyone know of a utility which will take a collection of files or a
file with multiple topics and an indication of where the topic changes
(say a set of extracted routine documentation headers) and generate a help
file readable by MAN_PROC?

I think it would be quite easy to do, but if it's already been done then
there's no point re-inventing the wheel.
