Did you know something of the compatibility of HDF5 to HDF4 and HDF3.
If it's not compatibel then I believe it's no chance to get it
supported.

I asked many times for a newer version of netCDF. 3.6 is the latest
release
at the moment but in IDL it's 2.4.

There was a problem with the compatibilty of HDF in newer versions.
HDF,CDF and netCDF are the scientific dataformats which are included to
idl.

They won't upgrade only one format because they are added as package and
I always get the answer that they won't upgrade because of the
incompatibilty
of HDF formats which then occure.

regards
Reimar
