Subject: wait loop Posted by Dominik[1] on Thu, 20 Sep 2001 09:28:11 GMT View Forum Message <> Reply to Message

hi there,

we would like to check a directory, if there is a file every 10 oder 20 minutes in an IDL programm For this we would like to use a waitung funktion, in a loop, which doesnt cost to much processor time.

Does somebody know a waiting function for this problem, because I coulnd find anything suitable in the IDL help files.

Thanks

Dom
