Subject: Is there a line widget Posted by Marcus O'Brien on Tue, 02 Oct 2001 12:50:58 GMT View Forum Message <> Reply to Message

Hi,

I'm looking for the equivalent of a line widget, similar to the menu separator. I thought idl had something like this (may have dreamt it), but can't find anything resembling it.

Anyone know if one exists but is too obviously named for me to find:)

marc
