My apologies for this off-topic post, but I thought this may be of interest to the people working with medical visualisation...

Available for sale: Voxar Plug & View 3D premium edition 3D medical volume visualisation software.

Estimated street price is around \$15,000. We are looking at liquidating our stock and so can offer very very competitive pricing.

Please send an email if you are interested to Karthik
(clunis_immensus@hotmail.com)

For more information about the software go to www.voxar.com
