Subject: 3D renderings (medical) in IDL?

Posted by mtadams on Mon, 15 Aug 1994 20:19:52 GMT

Hi all.

I do most of my image processing in IDL, and have for quite some time, so I'm very familiar with the package.

My question is can anyone tell me whether IDL's volume rendering capabilities can compare to those of, say, PovRay and other ray tracing engines.

From what I've seen of IDL's 3D volume rendering capabilities, I'd say not much. Any input?

matthew
