Hi,
If you have a newer version of IDL, won't the SOCKET procedure work?
This little toy worked for me. Someone at RSI claimed that this
*shouldn't* work, but it does appear to.
socket, unit, 'cow.physics.wisc.edu', 80, /get_lun
printf, unit, 'GET http://cow.physics.wisc.edu/~craigm/idl/idl.html'
text = "
while eof(unit) EQ 0 do begin
 readf, unit, text
 print, text
endwhile
free lun, unit
Craig
