
Subject: Please help. PostScript Import

I'm running IDL 3.5.1 under Windows 3.1 and would like to import PostScript graphs into Word for Windows 6. I've tried device, /encapsulate, but all I get after importing to Word, is the title, creator and date, with a border around it. No plot!

I've looked inside the print file IDL created and there are some references to \$IDL_DICT. Does this mean that extra IDL goodies are linked to the file, or is everything needed for the plot contained inside the .PS file.

Thanks in advance
Mike
