Subject: Create a simple algorithm in IDL Posted by Peter Lundh on Tue, 23 Oct 2001 10:21:01 GMT

View Forum Message <> Reply to Message

Hi-

I'm a Mathematics student at the University of Lund, Sweden and I'm new to IDL programming. I have chosen to work with IDL in our forthcoming Image Analysis project. I would like to create a simple application for pattern recognition (visual perception). I'd like some help on how to go about it, some pointers, or references.

Can anyone give me a hand?

Yours sincerely.

-Peter
