Ron,

I don't control my virus def unfortunatley. The sys admin's have control  
over the norton antiviri corporate edition. I don't agree with it, because  
they won't tell me about how it works, only don't worry about it. This makes  
me angry when instances such as this occur.

What exactly are you referring to anyways? I posted the replys to postings  
that I think you are referring to, to show that I had taken lengths beyond  
the normal user, in that I reported the spam to whoever is supposed to take  
care of it via spamcop. I don't think that it came from my computer here at  
work. To assume that it was I that sent it mean and hateful, I resent your  
personal attack on my use of this group.

Logan
