Subject: Rotate 3D matrix
Posted by bente on Fri, 26 Oct 2001 11:22:42 GMT

Hi,
have again an annoying problem.
Why does the Rot/Rotate functions work only on 2D-Array.
I want to rotate a 3D-Array around the z-Axis (3D-Tomographic data).
There must be a faster way than to use a FOR Loop to rotate each
slice!!

Does anyone have an idea?

with regards
Kay
