Does aNyBODY know where I can get an IDL source code for N-BODY simulation ?
In really, I'm interested in the simulation of a very few bodies [e.g. 3 to 5]
spanning for a limited amount of time [e.g. no more than 10^4 revolutions of
the closest double bodies].

Please send answers by e-mail: ragazzoni@astrpd.pd.astro.it

Thank you very much for your help
