This looks like a simple bug in the IDL 5.4 compiler under Windows2000.
If others confirm this, then RSI you may want to take note. Perhaps it
is fixed in 5.5 which I cannot afford yet.

PRO Showbug

```
numAll1Rets = 6  
segmentT = 2d
```

```
distancesT = segmentT*(Dindgen(numAll1Rets-2)+1d)
```

```
distancesT = segmentT*(1d+Dindgen(numAll1Rets-2))  
;This second statement generates a compile error:  
;%Syntax error.
```

```
Return  
End
```
