Hi,

I wanted to let folks know there is a new version of TeXtoIDL at:

<http://physweb.mnstate.edu/mcraig/textoidl>

The only change is that the function `str_sep`, used in `strtrans.pro`, has been replaced by `strsplit`. Apparently, `str_sep` was obsoleted in IDL 5.3. Thanks to Alexandre Beelen for bringing this to my attention.

The previous version of TeXtoIDL, 2.0, is still available at the website above for users of older versions of IDL.

The older version of TeXtoIDL does still work in IDL 5.5, incidentally; upgrade or not as you see fit...

Matt Craig
