Subject: Overbar in vector drawn fonts
Posted by rouse on Sat, 24 Sep 1994 00:47:21 GMT

Hi,

I need to put an over bar on some symbols used in a plot. This is
what I tried

'!SA!R!A-!N'

This draws the letter A with a hyphen above it. This is ok except
that the 'overbar' is not centered on the A.

How can I get the overbar to be centered on the character?
How can I draw one overbar atop a string of more than one character?

Thanks in advance, Roger
