---

Hi,  
who can give me a little help?  
I does know IDL but don`t know PV-Wave.

1. Is there any possibility to run PV-Wave (\*.PRO) files for matrix-data visualisation under IDL?
2. Have I to convert the \*.PRO-files somehow?
3. Can I substitute permanently PV-Wave with IDL whithout much programming?

Many thanks for any help or hints in advance!

Wladimir Jordanow
