Hi,

I am trying to run idl w/perl script. I do a system call for IDL w/in perl script.

When I do

```
tv!ct, R_CURR, G_CURR, B_CURR, /get  
write_png, 'file.png', tvrd(true=1), R_CURR, G_CURR, B_CURR
```

the image is saved upside down. I am using IDL 5.4 Does any one know how to correct this problem?

Thanks in advance..

- Tina
