Subject: IDL on OSX?

Posted by tim on Sat, 26 Jan 2002 18:12:23 GMT

I read on RSI's web site that they're offering a pre-release version of
IDL for Mac OSX some time this quarter. Does anyone have details about
signing up for this "beta test?"

Thanks,

Tim Lloyd, lloyd@lasp.colorado.edu
"There is something to be learned from a rainstorm. When meeting with a
sudden shower, you try not to get wet and run quickly along the road.
But doing such things as passing under the eaves of houses, you still
get wet. When you are resolved from the beginning, you will not be
perplexed, though you still get the same soaking. This understanding
extends to everything." -Yamamoto Tsunetomo
