Hi, there

Could some one help me on the color contour. I used the following command to plot the color contour with contour levels, but PV-wave tells me that

```
% POLYCONTOUR: Warning: Unclosed contour ignored.
```

What this means?

```
LABELS = [1,1,1,1,1,1,1,1,1,1,1]
```

```
INTERVALS=[1.,3.,5.,7.,9.,11.,13.,15.,18.,21.]*1E1
```

```
contour,/spline, P,X,Y,$
```

```
c_label=labels, levels=intervals,$
```

```
PATH_FILENAME='cpaths.dat',$
```

```
xstyle=1,ystyle=1,xrange=[0,10],yrange=[0,20]
```

```
POLYCONTOUR, 'cpaths.dat', color_index = sci
```

```
contour,/spline, P,X,Y,$
```

```
c_label=labels, levels=intervals,$
```

```
PATH_FILENAME='cpaths.dat', $
```

```
xstyle=1,ystyle=1,xrange=[0,10],yrange=[0,20],/noerase
```

Thank you.

John Z. Ding
