Thank you for your help Dr.Fanning. I have around 100 slices segmented and saved as .dcm using dicom_writer of Bhautik Joshi. Essentially each image has its image_index as 1. But i want to read all these images in a folder and save it as an array. so that i can access all the images as

slice = a[:,*,10]

Please tell me how i could do that.

Cheers,

Akhila.
