Subject: contour plot keys?

Hi all,

Is there a way to create a colour bar key next to a contour plot, associating contour colour with a value?

I've created a contour plot with colour fill, overplotted with contour lines with values but i'd prefer to get rid of the overplotted line values and instead have a colour bar key next to the plot, which associates each colour with a value.

Is this possible?

Cheers,

Manish
