```

Seems to be working correct on IDL 5.5 and Windows:

IDL Version 5.5, Microsoft Windows (Win32 x86).

```
IDL> help, /files
```

Unit	Attributes	Name
100	Read, Write, New, Reserved	c:\temp\junk.dat

```
IDL> get_lun, fu & print, fu
101
```

I do notice that mine says "Reserved" and yours doesn't.
I don't know what that means. I opened the file for writing
(OPENW). What did you do?

Cheers,

David
