It is hard to tell, with electronic conversation, whether something is just bristling with irony or not, but I hope you mean the smiley face and are not put off about asking questions here.

As you can tell by the thread on double precision values this morning, we are generally long-suffering. Some of us, however, are getting rather long of tooth and have a tendency to be crotchety on occasion. I apologize if my attempt at gentle humor came across too stridently. Lord knows we appreciate a woman's voice here.

Cheers,

David

P.S. Did you discover the problem? Was it with plotting system variables?
