Subject: HDF->DXF Posted by Mukunda P Raju on Tue, 19 Mar 2002 01:46:04 GMT View Forum Message <> Reply to Message

Hi..i have some data in the form of a hdf file which has 4 standard datasets. Id like to store this data as a DXF file so that it could be fed into 3D studio max to get a 3d animation. Any clues as to how to go about this. I dont seen any help on IDL with reference to DXF file format. Heeeeelp!..

regards

Mux
