Ahem,
my for loop ended up running a few more iterations
than I had intended. Hee Hee!

```
for offset = 21d,21d+3*8,3 do begin ; hours
```

Of course, one should type:

```
for offset = 21d,21d + 3*8,3 do begin ; hours
```

or:

```
for offset = 21d0,21d0+3*8,3 do begin ; hours
```

to get the expected results.

```
IDL> help,21d+3*8
```

```
<Expression>  DOUBLE  =      168000.00
```

Weeeeehahahaha!
