Hi,

Can anyone come up with an efficient way to subtract a single image from an array of images without using a loop, as in

imgArr = imgArr - img1

where,

imgArr = Ionarr(12,512,512)

and,

img1 = lonarr(512,512)

as opposed to

For ii=0,11 do imgArr[ii,\*,\*] = imgArr[ii,\*,\*] - img1

Thanks for any suggestions.
