Subject: Findfile finds no files
Posted by Pete Riley on Wed, 03 Apr 2002 02:43:03 GMT

Hi,

I just came across a weird problem I'm not sure if it's been talked about before. I'm using IDL 5.5 on linux RH 7.2. I ran some code which calls findfile() last week and everything worked out fine. Today, it returns no files, even with

Print,findfile('*')

Yet $ls shows all the files in the current directory.

Has anyone come across this?

Thanks in advance, Pete
