<blockquote type="cite">

<pre wrap="">I have tried all combinations of color models for my printer object and

images (indexed, rgb),
under unix and linux OS but the output is still gray.

My
question is: can the XPrinter option 'Generic(File Only)' and EPSF
selected print
colored
graphic trees.
</pre>

</blockquote>

<pre wrap=""><!-->
I don't know how it is on UNIX, but in the Windows world
if your
printer driver doesn't support color, you ain't gonna
get color output, no how, no
way.

</pre>

<blockquote type="cite">

<pre wrap="">If not, is there any possibility to save a graphics
tree/view to an eps
file?
</pre>

</blockquote>

<pre wrap=""><!-->
Have you tried the Clipboard, as I suggested
earlier?

Cheers,

David

</blockquote>

Dear David,

it works!!!!

I want to thank you for your help, David.

It was posible to me to solve the problem with

your suggestion. (to use IDLgrClipboard object)

Thanks,

Milan
