Can anyone point me to IDL codes for reading and writing analyze format images as defined be Mayo's Analyze and discussed at <http://www.dclunie.com/medical-image-faq/html/part5.html> ?

I've got some beginning of my own reader/writer. If there isn't anything else out there, I'll clean it up and eventually make it available.

Mike

P.S. Thanks for all the followups to my question about getting access to command line arguments.
